I have had this compressor for a year and this compressor has worked great for rotating tires and operating my air tools without loss of power the compressor steadily maintains 2.1 SCFM. I have a 5.1SCFM yet I find that this compact compressor gets all my mechanical jobs done without having to use a large compressor. I highly recommend this compressor.

Super quiet, it's about as loud as an old freeze. No one complains about running it in my condo. Perfect for inflating large truck tires too.

Works for general inflation USA and small tools I used it for framing nailer and finishing nailer when remodeling my kitchen and was happy with that. Much quieter than my old compressor. For garage use I put it in series with an old 30gal tank an it keeps up with most things. This is really great for the price. I have had it for 2 years now with occasional/weekend use with no issues

This thing is quiet!! No, more of that noise when it is filling up. I liked the unit so much that I have 2 of them. I have one in my basement and you can turn it on without the house sounding like a plane is flying thru. Before, I had a different brand in the basement and it sounded like a plane flying thru.
