From the manufacturer

California Air Tools 2010A

The California Air Tools 2010A Ultra Quiet and Oil-Free Air Compressor is designed to be one of the quietest air compressors in the industry having only 60 decibels of sound. The powerful 1.0 HP (SP-9413) motor operates at only 1680 RPM creating less noise and less wear. The 'New' SP Series of Ultra Quiet Air Compressor Motors have been designed to increase duty cycle and allow for longer continuous run times. The Oil-Free Dual Piston Pump System is engineered for high performance and durability. The CAT-2010A Air Compressor has an Oil-Free Dual Piston pump designed to have a life cycle before wear of 3000 plus hours compared to other comparable air compressors with life cycles of 500 hours or less. The Oil-Free pump allows for use in a variety of temperatures and uneven terrains. The 2.0 Gallon Aluminum (Rust-Free) Air Tank is Lightweight (35 lbs) and very easy to transport. This air compressor is ideal for anyone working inside where noise is a major issue.

Ideal for hobbyist woodworker -- very quiet, well made (detailed specs)

Reviewed in the United States on August 11, 2016

Verified Purchase

This California Air Tools 2010A Ultra Quiet and Oil-Free 1.0 HP 2.0-Gallon Aluminum Tank Air Compressor is AMAZING! I contemplated buying a new compressor for years, but kept putting it off because I hated the noise of my old Campbell Hausfield compressor. Well, now that I own this one, all I can say is THIS IS THE GREATEST COMPRESSOR EVER for a hobbyist or woodworker with a small shop. Seriously, I love it!

[UPDATE 11-4-2019: After three full years of fairly frequent use in widely varying conditions, ranging from very cold to very hot weather and year-round use, mine finally quit. A cast metal plug behind the pressure relief valve cracked and blew off the top, yielding a spectacularly loud HISSSSSS like an explosion. When I tried reinstalling it, I could smell some faint burnt electronics smell in the powerhead, so I'm not sure what exactly happened, but frankly, I went ahead and ordered another one of these. It always worked great, and if I get another 3 or 4 years out of the new one, I'll be pleased for the \$160 I paid.

G. Heumann

Better than I expected, and I expected a lot

Reviewed in the United States on October 11, 2022

Verified Purchase

I've had a belt drive 10 gal tank compressor under my bench for 20 years. It has served me well but... it was loud. Not obnoxious like el-cheapo direct drive compressors but still loud. It had similar performance to this California Air Tools 2010A in terms of pressure and CFM.

The new one came and I couldn't wait to try it. It is way smaller. It is way lighter and easier to move. And it is WAY QUIETER. Both my employee and I were blown away. Very happy so far!

Don't wait any longer

Reviewed in the United States on July 20, 2022

Verified Purchase

I have been looking at the California air compressors for a while now. I couldn't believe they could be as quite as advertised. Well, they are.

This is the quietest air compressor I have ever come across. You will be pleasantly surprised. I purchased the 1hp 2lb aluminum tank unit. It is compact in size yet produces great

pressure and air volume for its size.
The unit is very light weight and super easy to pick up and move anywhere you need it.
My only regret is i should have purchased it years ago.
If you are looking for an ultra quite, light weight air compressor, this one fits that need.
Don't wait any longer. Just put it in your cart and check it out.

Onerka

Pretty amazing compressor

Reviewed in the United States on September 4, 2022

Verified Purchase

You'll giggle the first time you turn it on it's so quiet. Plenty of CFM for basic basement use.
It's about as loud as a running clothes dryer.

Helpful Report abuse

Darkwave Fan

I love everything about it, except the placement of the primary pressure gauge.

Reviewed in the United States on February 18, 2022

Verified Purchase

The California Air Tools 2010A is a great little air compressor. It is really quiet, which is the main selling point. I'm just using it for small projects, so the 2 Gallon tank is fine for me. it doesn't weigh much, so it's easy to carry. I haven't seen any leaking at all.

I've done a bunch of small hobby projects - like picture frames and boxes - using my pneumatic stapler and brad nailer. The compressor has to run after about two dozen staples, but it's so quiet that I don't mind. I work pretty slow, so it's not running frequently.

If I had more storage room in my garage, I'd get a model with a bigger tank, but with the limited space I have, the 2 Gallon tank is a nice compromise. It's light enough to be considered portable. I can carry it from my garage to the backyard or my truck without much exertion. I wouldn't want to carry it up and down stairs often. I put the compressor on a small dolly, so I can roll it, instead of carrying it.

Lino Sapienza

wow I can still hear the TV in my garage while using it Amazing. Highly recommend

Reviewed in Canada on November 22, 2021

Verified Purchase

I have been eyeing this for over a year. After purchasing a 6 Gal Pan version when my old one was handed down, I totally regretted it. The noise was unbearable inside my 3 car garage. You would think the space would handle it. Nope, got rid of it and ordered the California compressor. Works great in the garage and indoors with all my nailers and small sanders but that's where it stops. If you are looking for commercial work, look for a bigger model. I don't regret this purchase, if you can afford the extra hundred dollars, totally recommend

Only 5 left in stock - order soon.

Reviewed in Canada on March 21, 2020

Verified Purchase

Today, I received the air compressor. The box has been opened before and resealed. When I did test running, I found it was not working normally. It reached 120 PSI then pressure switch was triggered. Air pressure dropped to 90 PSI and the motors wont kicked on. I kept releasing air to 0 psi the motors still not restarted. My other loud husky air compressor works fine on this outlet. I guess this unit must be defective and someone before me found that and returned it. Hope Amazon could fully checked all returned items and make sure they work normally before resell them. 5 stars for the low noise level, really quiet, very impressive. 1 star for Amazon's terrible work. So overall 3 stars.

 Steven Woodward
Better than standard portable compressors

Reviewed in Canada on November 1, 2018

Verified Purchase

1. Induction motor runs slowly with direct drive to large pistons to achieve Ultra Quiet, and long life as a bonus. Other small compressors use high speed motors which are noisy and have shorter life span. In spite of low speed the 2010A delivers 2.2 CFM at 90 PSI or 3.1 CFM at 40 PSI which is a very good for a small unit.
2. Aluminium tank and motor housing reduce weight and eliminate rust.
3. Quality of components look and feel good. Looks easy to repair when required. Instruction book includes diagram with parts list.
4. Lost 20 PSI overnight which would be no issue in normal use.
5. Balanced carry handle
