Customer questions & answers

s vs sp

All

Product Information

Customer Q&A's

Customer Reviews

Customer questions & answers

Q: What is the difference between the 1060s and 1060sp model?

A: They are the same in capacity. The difference is the setup of the gauges. The gauges on the "SP" model are display on a metal display when the other doesn't. Visually the "SP" model looks better plus it seems that the components are better protected. Is a great small compressor and extremely low in noise. [see less](#)

By Antonio Perez on December 11, 2021

Q: What is the difference between this model and the cat-1p1060sp. is the sp newer?

A: Don't know

Customer Reviews

Love this for airbrushing. Quiet.

By LukeP815 on December 19, 2018

Been using as my airbrush compressor for a few months now and this thing is awesome, runs good, definitely quiet, I've actually ran it in my bedroom at 1 am and didn't wake up the people in the rooms next to mine. The tank helps it from running constantly and it has a fairly small footprint, I'd say just invest in this if you airbrush a lot in a small space, vs those cheap ones you find for like \$50 and they break easily. This is great. [see less](#)

Quiet & Fast but large

By davige on February 20, 2018

Did some research and decided to buy a California Air Tools 1P1060S compressor especially since the price had dropped to \$85 at the time. While quiet and fast to refill, the Cal Air weighed 50% more (29 vs. 20 lbs), was bigger and harder to store on a garage shelf than the little Senco PC1010 that I had borrowed from a friend to run a 15ga nailer. Returned Cal Air for the Senco and I'm very happy with it. Don't get me wrong, the CAT is a great little compressor but if size & weight mean more than quiet & fast, get the Senco. [see less](#)

Works as advertised

Reviewed in the United States on October 18, 2022

Size: 1-(Pack) **Verified Purchase**

As of the time of this reviews, I've only used the unit maybe a dozen times. Appears to be of good build quality. Is VERY quiet during runtime. It's a little heavier than I expected, but I can deal with that.

 Aggie/Bulldog

Quiet and does the job well.

Reviewed in the United States on September 7, 2022

Size: 1-(Pack) **Verified Purchase**

Excellent at noise reduction without sacrificing performance. It's a HUGE improvement over other small compressors I have owned. This is very portable, builds pressure fast and does the job. Perfect for stapler, brad or finishing nail guns, or inflating smaller tires. I have yet to try it on my framing nail gun but I would guess it could handle the job as well. Very please!

 Kindle Customer

Decent compressor design, but a crap-shoot when it comes to quality

Reviewed in the United States on October 8, 2022

Size: 1-(Pack) **Verified Purchase**

When this compressor showed up, I immediately plugged it in and did a pressure leak-down test. The tank reached full pressure very quickly - just under a minute to get to 120PSI (indicated), and remained within 5lbs of that reading for several days. On the first "real" use (to drive an airbrush), the tank would bleed down to 0PSI (causing my airbrush to sputter ... grrrrr) but the compressor wouldn't kick on. I flicked the power lever to OFF then back to ON and the compressor started and filled and shut itself off. Second cycle, I could hear the pressure switch kick over at about ~60PSI - but the compressor didn't start again. Once again, flick the power lever to OFF then ON - but no start. Repeated this several times and finally the compressor kicked on. Needless to say, I had to switch back to my main compressor to keep working. I like the portability and overall features of the compressor, so I'm returning this one and hope it's replacement won't be plagued by the same - or other - issues.

Great bang for your buck

Reviewed in the United States on August 15, 2022

Size: 1-(Pack) **Verified Purchase**

If you are looking for an air compressor that wont break the bank, and you want to be able to hear yourself think - get it. Don't get this if you are looking for something so silent that you can barely hear. Those run \$600-1000, search for a silent lab air compressor if that is your goal.

Jeff Conley

Small, quiet, just what I needed

Reviewed in the United States on May 13, 2022

Size: 1-(Pack) **Verified Purchase**

First the packaging. Came in a sturdy box well guarded inside with packing. No issues right out of the box. Easy to use regulator with a working gauges that are actually pretty close to perfect. From the floor up about half way on my shin is the height footprint. Normal feet apart stance is about the width. A large shoe is how deep it is front to back. The handle was actually in a good spot for what I needed to do and get it n a tight spot. It is about conversation loud/noise. Not yelling-just normal. A long enough power cord that it did not have to sit right on top of an outlet. Combine a quick connect type hose that plugs i to the air delivery hole and you have air at your command. It is not meant for large air tool. No way could it keep up. But a few short blast of air to blow off a work bench-perfect. The price is right, the noise level is great, the air delivery is easy and typical air connections, electrical needs are nothing special-just a 120 volt three prong outlet. It fits in most spots with room to spare (if you need an air compressor-they are usually not a small piece of equipment)

I would buy this again and again and again

Rob Frechette

Small, Light, and VERY quiet.

Reviewed in the United States on August 10, 2022

Size: 1-(Pack) **Verified Purchase**

I bought this as a gift for my son, who wanted to start airbrushing as a hobby.

I was very surprised at how quiet this compressor is. And I mean VERY surprised. On start-up, it doesn't even startle our very jumpy cat.

The build quality seems above average, as it holds pressure when turned off for an hour, or so.

I'm considering buying one for my airbrush set-up. This seems better suited to the task than the "airbrush compressor" I have now.

Patrick Dionne

Outstandingly Happy with this compressor!

Reviewed in Canada on September 19, 2018

Size: 1-(Pack) **Verified Purchase**

This product astounded me! They are promoted as a quiet compressor but I was not expecting how understated their claim was. You can talk at normal volume over this when it is running. At \$129 it is a purchase I feel very good about. This is the 5th air compressor I have purchased but it is my first from California Air Tools and I am really impressed.

My old, comparably small compressor stopped working and now I am glad it did! When my old compressor kicked in you just couldn't wait for it to stop. I am sure my neighbors could hear it. This thing is so unbelievably quiet! If its durability lives up to my initial impression I could give no better advice than if you are looking for a small compressor you should not be disappointed with this nice little unit!

Any company that puts together such a nice product and can deliver it to your door for such a price is really a great find in today's market.

 Cal

Amazingly quiet and quick pressure build.

Reviewed in Canada on February 12, 2020

Size: 1-(Pack) **Verified Purchase**

Amazingly quiet. (Make sure you put the muffler air filter on... pretty quiet even without it, but what a difference when it is installed). Pretty small though I wish the handle is removable for even lower profile, and the pressure valve is the pull-to-adjust, push-to-lock type. Very satisfy right from the start, the next is it's longevity. :)

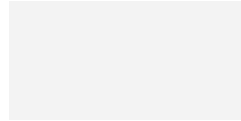

Quickly fill from 0-125psi, then stops. Leaks air gradually and then hold steady at 8KG/cm2 for 12min and counting. Looking good I'd say.

I'd give full stars if the unit is made same dimension as the smallest measure for people with limited storage space. (Shrink the handle/protection cage further)

Afterthoughts: (few uses after)

Still great and quiet unit. Perfect for condo users. But if space is not a concern, get a bigger

 Leo Beaudoin

Quiet with a FAST recovery time!

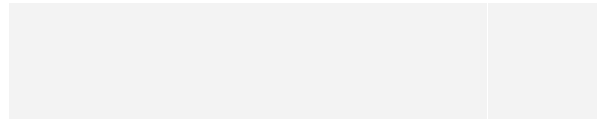

Reviewed in Canada on January 31, 2019

Size: 1-(Pack) **Verified Purchase**

I mostly bought this compressor for cleaning my pellet stoves and computers(with pressure dialed down), as the compressed air dusters run out of pressure really fast and are expensive. So I ordered an air kit to go with the compressor. The compressor works great and fills up very quickly. It is surprisingly quiet, not like those pancake compressors which sound like a jackhammer.

I was a little worried about the quick connect air hose attachment on the compressor-the release ring looked like it was stuck. I thought I might have to replace it, but as soon as I plugged in a male quick connect fitting, it popped securely in place. This compressor is very well designed with quality craftsmanship. The compressor has no where near the power of my Campbell Hausfeld 5HP 26 Gallon compressor, but it will come in handy for cleaning, and is definitely more portable than my big brute, lol!

I love this thing!

7 people found this helpful

Report abuse

 Jerry Vanee

This thing is quiet.

Reviewed in Canada on August 7, 2021

Size: 1-(Pack) **Verified Purchase**

I bought this because many of the reviews said it was quiet. They were not kidding. You can plug it in, turn it on and have a conversation in the same room. You have to raise your voices a bit, but you certainly don't need to shout. One review said to make sure you install the "muffler". It is just a small piece of plastic tubing you stick on the inlet filter. As quiet as this thing is without that, it gets quieter with that small tubing installed. If you hate loud compressors and don't need a ton of compressed air, buy one of these. You will not regret it.

Carlos Albarrán

Excelente.

Reviewed in Mexico on August 24, 2019

Size: 1-(Pack) **Verified Purchase**

OK, este compresor es para el artista de aerografo, el carpintero con el compresor dañado o con la necesidad de moverse o el detallista automotriz, incluso para el técnico en reparación de electrónicos.

Es una compresora extremadamente silenciosa con un tanque tan pequeño que no proporciona una presión constante por un largo tiempo. No sé si se pueda conectar un tanque adicional más grande, eso dependerá del ciclo de trabajo del compresor, hasta el momento he barnizado una puerta de madera cuya superficie es mayormente vidrio y el esqueleto de madera, me funcionó de maravilla pero si noté un decremento de presión al finalizar cada capa.
