Fucoidan is a natural product from the sea. It is a special kind of seaweed. However, because people generally do not like the taste of seaweed by itself, Fucoidan is generally mixed (by the vendor) with fruit and vegetable juices to mask the taste of seaweed.

The anti-cancer effect of fucoidan has been the focus of some scientific studies which are published on PubMed. It may significantly reduce the side-effects of the chemotherapy.

Vendor Information for Liquid Fucoidan

[ZRadical](#) is the *only* certified organic, pure fucoidan beverage. Not only is ZRadical the *only liquid beverage on the market with pure fucoidan* (using a proprietary cold water vacuum extraction), but it supports healthy cardiovascular function, brain clarity, and joint maintenance.

It also:

- comes from plants harvested from the *extreme northern and southern hemispheres* where the purest plants are found.
- divers are trained to harvest in an *environmentally responsible* way, and when *fucoidan content is at its peak*.
- *Pharmaceutical grade facilities* and a *solvent-free extraction* process ensure the highest quality and maximum bioactivity.

Unlike most juices marketed as “super-nutrient” drinks, ZRadical is sold exclusively through a [Youngevity](#) distributor via a direct sales channel. This is partly because health food store employees do not have the needed expertise to sell and support this product.

Youngevity ships their fucoidan product directly to your door throughout the United States and several other countries. (See complete list below.)

Product Availability:

Youngevity can ship to any of the following countries:

Australia, Barbados, Canada*, Finland*, Guam, Israel*, Mexico, Netherlands*, New Zealand*, Puerto Rico, Russian Federation, Sweden*, Switzerland*, Togo*, Trinidad and Tobago*, United Arab Emirates*, United States, Virgin Islands.

**International shipping rates apply.*

Vendor Information for the Pill Version of Fucoidan – U-Fn

Due to shipping costs, some people prefer a pill version of Fucoidan. The Cancer Tutor website does not have enough information to determine how effective the pill version is (it is not from the same vendor), so we cannot endorse it until we get more information.

Here is a vendor of the pill version: **U-Fn:** [Fucoidan in Pill Form](#)
