

There is NO variant, Not novel, NO pandemic – Dr David Martin with Reiner Fuellmich

July 11, 2021
86,342 views

This is a bombshell video conference between [Dr David E Martin](#) and [Reiner Fuellmich](#) that should fatally debunk the official COVID narrative, if you send this to everybody you know who still watches cable news.

David makes a tight case, backed by mountainous evidence that COVID-19 wasn't a lab leak. It is a US bioweapon, as is the so-called vaccine. The primary motive is money.

Everything David says can be used in a court of law and is backed by over 20 years of research, patent filings and FOIA documents, including Anthony Fauci's recently-released emails. David does not speculate about anything. He doesn't get into any ulterior motives beyond what he has seen in official or verified documents. What he can definitively prove is that COVID-19 is a financially-motivated scam more than 20 years in the making.

Furthermore, he says "SARS-CoV-2" is not novel. It's the same old SARS (SARS-CoV-1) bioweapon targeted for human lung epithelium that Anthony Fauci commissioned the University of North Carolina to create and which was patented on April 19th 2002, months before what he calls the "alleged" outbreak in Asia.

David then goes through the CDC's patent filing for SARS coronavirus on April 25th, 2003, followed three days later by a filing by Sequoia Pharmaceuticals for the treatment of same, in a patent on anti-viral agents of control of infections by coronavirus. Sequoia Pharmaceuticals (subsequently, AB Links Pharmaceuticals) was later rolled-up into the proprietary holdings of Pfizer, Crucell and Johnson & Johnson.

David says this is a [RICO](#) case. "And the RICO pattern, which was established in April 2003 for the first coronavirus was played out to exactly the same schedule, when we see SARS-CoV-2 show up, when we have Moderna getting the spike protein sequence by phone from the Vaccine Research Center at NIAID – prior to the definition of the novel subclade. How do you treat a thing before you actually have the thing?"

The goal of all of this has been to institute an aggressive "pan-coronavirus" vaccine schedule for adults, that seeks to replace our natural immune system with synthetic mRNA biology. This goal and the means to achieve it is encapsulated in a statement made by Wuhan Institute Gain-of-Function contractor, Peter Daszak in 2015: "We need to increase public understanding of the need for medical countermeasures, such as a pan-coronavirus vaccine. A key driver is the media and the economics will follow that hype. We need to use that hype to our advantage to get to the real issues. Investors will respond if they see profit at the end of the process."

David says, "Peter Daszak, the head of EcoHealth Alliance; Peter Daszak, the person who was independently corroborating the Chinese non-lab leak non-theory, because there wasn't a lab leak. This was an intentional bioweapon of spike proteins, to inject into people, to get them addicted to a pan-coronavirus vaccine. This has nothing to do with a pathogen that was released and every study that's ever been launched to try to verify a lab leak is a red herring..."

"It's always been all about money. And just to answer a question that was asked slightly earlier, the script for this was written first January 6th, 2004."

Reiner asks, "January 6th, 2004. Who wrote the script?"

"Merck, at the conference called *SARS and Bioterrorism*. 'Bioterrorism and emerging infectious diseases, antimicrobials and immune modulators.' Merck introduced the notion of what they called the 'New Normal', which is the language that became the branded campaign that was adopted by the World Health Organization, the Global Preparedness Monitoring Board, which was the board, upon which the Chinese Director of the Centers for Disease Control, Bill Gates' Dr Elias of the Gates Foundation and Anthony Fauci sat together on that Board of Directors but the first

introduction of the New Normal campaign, which was about getting people to accept a universal pan-influenza, pan-coronavirus vaccine was actually adopted January 6th, 2004.”

As to the vaunted Delta and Lambda “variants” that we’ve been hearing about lately, David says, point-blank, “There is no evidence that the Delta Variant is somehow distinct from anything else on [GISAID](#). The fact that we are now looking for a thing doesn’t mean that it *is* a thing, because we are looking at fragments of things...Because of the way in which we currently sequence genomes, which is actually a compositing process – it’s what we’d call in mathematics, an [interleaving](#) – we don’t have any point of reference to actually know whether or not the thing we’re looking at is, in fact distinct from either clinical or even genomic sense...It’s just an alteration and a stop-and-start of what you call the ‘reading frame’. There is no ‘novel’ anything.”

As the head of an organization that monitors all breaches of biological weapons treaty violations, that publishes lists of names and contact information and that identifies who is financing these breaches, David says, “For us, it wasn’t hard to figure out that this was not a public health crisis, this was an opportunistic marketing campaign to address a stated objective. And that’s why this is Occam Razor, it’s the easiest thing to describe, because they’re the ones that said it. The Occam’s Razor reality is that they said they needed to get the public to accept a pan-coronavirus vaccine countermeasure and they needed to the media to create the hype and investors would follow where they see profit.

“You do not have anything else you need to rely on to explain the events of the past 20 months than the actual statement of the actual perpetrator. I don’t do the navel-gazing exercise of going in to try to understand whether there were ‘mommy issues’ behind a bank robber. If they’re holding a bag of money outside of a bank, I actually make the crazy assumption that maybe they’re a bank robber.

“Similarly, if I have somebody who says ‘We need to use the media to hype the medical countermeasure,’ which is actually the injection of a synthetic, recombinant, chimeric protein developed off a computer simulation, if I’m actually going to listen to the motivation for why that might be being done, I will listen to the person doing the simulation, who says, ‘Investors will follow where they see profit.’ I don’t need more explanation.”

4,000 PATENTS PERTAINING TO SARS

David begins by telling Reiner that his team has reviewed the over 4,000 patents pertaining to the SARS coronavirus and done a comprehensive analysis of the financing of all of the manipulations which gave rise to SARS as a subclade of the Beta Coronavirus family.

David’s team took the reported gene sequence of the so-called “novel” coronavirus, as indicated by the ICTV (the International Committee on the Taxonomy of Viruses of the World Health Organization) and compared this gene sequence with those in the patent records as of early 2020 and what they found were over 120 patented pieces of evidence to suggest that the declaration of a novel coronavirus was “entirely a fallacy.”

David says, “There was no novel coronavirus. There are countless very subtle modifications of coronavirus sequences that have been uploaded. But there was no single identified novel coronavirus, at all. As a matter of fact, we found records in the patent records of sequences attributed to novelty going to patents that were sought as early as 1999. **So, not only was this not a novel anything...it’s not been novel for over two decades.”**

David then takes us on a short journey through the patent landscape.

“The first vaccine ever patented for coronavirus was actually sought by Pfizer...which was specifically this ‘S’ spike protein – so the exact same thing that allegedly we have rushed into invention – the first application was filed on January 28, 2000, twenty-one years ago.

“So the idea that we stumbled on the way to ‘intervene’ on vaccines is not only ludicrous it is incredulous, because Timothy Miller, Sharon Klepfer, Albert Paul Reed and Elaine Jones, on January 28th, 2000 filed what ultimately was issued as US Patent #6372224, which was the spike protein virus vaccine for the canine coronavirus, which is actually one of the multiple forms of coronavirus.

“But as I said, the early work, up until 1999 was largely focused in the area of vaccines for animals. The two animals receiving the most attention were probably Ralph Baric’s work on rabbits and the rabbit cardiomyopathy that was associated with significant problems among rabbit breeders and then, canine coronavirus, in Pfizer’s work to identify how to develop ‘S’ and spike protein vaccine target candidates, giving rise to the obvious evidence that says that neither the coronavirus concept of a vaccine, nor the principle of the coronavirus, itself as a pathogen of interest, with respect to the spike protein’s behavior is anything novel, at all. As a matter of fact, it’s 22 years old, based on patent filings.

“What’s more problematic, actually the most egregious problem is that Anthony Fauci and NIAID found the malleability of coronavirus to be a potential candidate for HIV vaccines.

SARS IS A MAN-MADE BIOWEAPON

“SARS is actually not a natural progression of a zoonotic modification of coronavirus. As a matter of fact, very specifically in 1999, Anthony Fauci funded research at the University of North Carolina, Chapel Hill specifically to create – and you cannot help but lament what I’m about to read, because this comes directly from a patent application filed on April 19th, 2002...where the NIAID built an infectious, replication-defective coronavirus. It was specifically targeted for human lung epithelium.

“In other words, we made SARS. And we patented it on April 19, 2002, before there was ever any alleged outbreak in Asia, which as you know, followed that by several months.

“That patent was issued as #7279327. That patent clearly lays out, in very specific gene sequencing, the fact that we knew that the ACE receptor, the ACE-2 binding domain, the S1 spike protein and other elements of what we have come to know as this ‘scourge pathogen’ was not only engineered, but could be synthetically modified in the laboratory using nothing more than gene sequencing technologies; taking computer code and turning it into a pathogen or an intermediate of the pathogen.

“And that technology was funded exclusively, in the early days as a means by which we could actually harness coronavirus as a vector to distribute HIV vaccine...

“So it gets worse. My organization was asked to monitor biological weapons treaty violations in the very early days of 2000. You’ll remember the [anthrax events](#) in September of 2001. And we were part of an investigation that gave rise to the Congressional inquiry into not only the anthrax origins but also what was unusual behavior around Bayer’s Ciprofloxacin drug, which was a drug used as a potential treatment for anthrax poisoning. And throughout the fall of 2001, we began monitoring an enormous number of bacterial and viral pathogens that were being patented through NIH, NIAID, [USAMERIID](#), the US Armed Forces Infectious Diseases program and a number of agencies internationally that collaborated with them.

“And our concern was that coronavirus was being seen not only as a potential manipulatable agent for potential use as a vaccine vector, but it was also very clearly being considered as a biological weapon candidate. And so our first public reporting on this took place prior to the [SARS outbreak](#) in 2001, so you can imagine how disappointed I am, to be sitting here 20 years later, having 20 years earlier pointed out there was a problem looming on the horizon with respect to coronavirus.

“But after the alleged outbreak. And I will always say, ‘alleged outbreak’, because I think it’s important for us to understand that coronavirus, as a circulating pathogen inside the viral model we have is actually not new to the human condition and it is not new to the last two decades, it’s actually been part of the sequence of proteins that circulates for quite a long time.

“But the alleged outbreak that took place in China in 2002, going into 2003 gave rise to a very problematic April 2003 filing by the United States Centers of Disease Control and Prevention. And this topic is of critical importance to get the nuance very precise. Because, **in addition to filing the entire gene sequence on what became SARS coronavirus – which is actually a violation of 35 US Code Section 101 – you cannot patent a naturally-occurring substance, the 35 US Code Section 101 violation was Patent #7220852.** Now, that patent also had a series of derivative patents associated with it. These are patent applications that were broken apart, because they were of multiple, patentable subject matter.

“These include, US Patent #46592703P, which is actually a very interesting designation, US Patent #776521. These patents not only covered the gene sequence of SARS coronavirus, but also covered the means of detecting it, using RTPCR.

“Now, the reason why that’s a problem is if you actually both own the patent on the gene, itself and you own the patent on its detection, you have a cunning advantage to being able to control 100% of the provenance of not only the virus, itself but also its detection, meaning you have entire scientific and message control.

“And this patent, sought by the CDC, was allegedly justified by their public relations team as being sought so that ‘everyone would be free to be able to research coronavirus’. The only problem with that statement is it’s a lie. And the reason why it’s a lie is because the Patent Office not once but twice rejected the patent on the gene sequence as ‘unpatentable’, because the gene sequence was already in the Public Domain.

“In other words, prior to CDC’s filing for a patent, the Patent Office found 99.9% identity with the already-existing coronavirus recorded in the Public Domain and over the rejection of the Patent Examiner, and after having to pay an appeal fine in 2006 and 2007, the CDC overrode the Patent Office’s rejection of their patent and ultimately, in 2007, got the patent on SARS coronavirus.

“So every public statement that CDC has made, that said this was in the public interest is falsifiable by their own paid bribe to the Patent Office. This is not something that’s subtle. And to make matters worse, they paid an additional fee to keep their application private. Last time I checked, if you’re trying to make information available for the public research, you would not pay a fee to keep the information private.

SARS-COV-1 = SARS-COV-2

“I wish I could have made up anything I just said but all of that is available in the public Patent Archive record, which any member of the public can review. And the Public Pair, as it’s called at the US Patent Office has not only the evidence but the actual documents, which I have in my possession.

“Now, this is critically important...because ‘fact-checkers’ have repeatedly stated that the novel coronavirus, designated as SARS-CoV-2, is in fact distinct from the CDC patent. And here’s both the genetic and the patent problem: If you look at the gene sequence that is filed by CDC in 2003, again in 2005, and then again in 2006, what you find is identity in somewhere between 89% to 99% of the sequence overlaps that have been identified in what’s called the “Novel Subclade” of SARS-CoV-2.

“What we know is that the core designation of SARS coronavirus, which is actually the clade of the Beta coronavirus family and the subclade that has been called SARS-COV-2 have to overlap from a taxonomic point of view. You cannot have ‘SARS’ designation on a thing without it first being SARS.

“So the disingenuous fact-checking that has been done, saying that somehow or another, CDC has nothing to do with this particular patent or this particular pathogen is beyond both the literal credibility of the published sequences and it’s also beyond credulity, when it comes to the ICTV taxonomy, because it very clearly states that this is, in fact a subclade of the clade called SARS coronavirus.”

David then goes through the CDC’s patent filing for SARS coronavirus on April 25th, 2003, three days later, followed by a filing by Sequoia Pharmaceuticals, a Maryland corporation for a patent on anti-viral agents of treatment and control of infections by coronavirus.

“Ask yourself a simple question,” David says. “How would one have a treatment for a thing that had been invented three days earlier? The patent in question, the April 28th, 2003 patent, #7151163 issued to Sequoia Pharmaceuticals has another problem. The problem is, it was issued and published before the CDC patent on coronavirus was actually allowed. So the degree to which the information could have been known by any means other than insider information between those parties is zero. It is not physically possible for you to patent a thing that treats a thing that had not been published, because CDC had paid to keep it secret. This, my friends, is the definition of criminal conspiracy, racketeering and collusion. This is not a theory. This is evidence...”

Reiner says, “This well could blow up into a RICO case, ultimately.”

David says, “It is a RICO case. It’s not *could* blow up into it, it is a RICO case. And the RICO pattern, which was established in April 2003 for the first coronavirus was played out to exactly the same schedule, when we see SARS-COV-2 show up, when we have Moderna getting the spike protein sequence by phone from the Vaccine Research Center at NIAID – prior to the definition of the novel subclade. How do you treat a thing before you actually have the thing?”

Reiner laughs.

David says, “It’s gonna get worse, here. On the 5th of June 2008, which is an important date, because it is around the time that DARPA, the Defense Advanced Research program in the United States actively took an interest in coronavirus as a biological weapon. June 5th, 2008. AB Links, which is part of Sanofi files a series of patents that targeted what we’ve been told is the novel feature of the SARS-COV-2 virus. And you heard what I just said. This s the 5th of June, 2008.

“Specifically, they targeted the polybasic cleavage site for SARS-CoV-2, the novel spike protein and the ACE-2 receptor binding domain, which is allegedly novel to SARS-CoV-2 and all of that was patented on the 5th of June, 2008 and those patents, in sequence were issued between November 24th of 2015 and, which was US Patent #9193780. So that one came out after the Gain of Function moratorium. That one came out after the MERS outbreak in the Middle East but what you find is that, then in 2016, 2017, 2019, a series of patents, all covering not only the RNA strands but also the subcomponents of the gene strands were all issued to AB Links and to Sanofi.

“And then, we have Crucell, we have Rubius Therapeutics, we have Children’s Medical Corporation, we have countless others, that include Ludwig-Maximilian Universität in München, Protein Science Corporation, Dana Farber Cancer Institute, University of Iowa, University of Hong Kong, Chinese National Human Genome Center in Shanghai, all identifying in patent filings, that ranged from 2008-2017, every attribute that was allegedly uniquely published by the single reference publication, the novel bat coronavirus reveals ‘natural insertions at the S1/S2 2 cleavage site of the spike protein and possible recombinant 3 origin of the SARS-CoV-2 virus,’ [the paper that has been routinely been used to identify the novel coronavirus](#).

“Unfortunately, if you actually take what has been reported to be novel, you find 73 patents issued between 2008 and 2019 that have the elements that were allegedly novel in the SARS-CoV-2, specifically as it relates to the polybasic cleavage site, the ACE-2 receptor binding domain and the spike protein.

“So the clinically novel components of the clinically unique, clinically contagious – you know where I’m going with this – there was no outbreak of SARS, because we had engineered all of the elements of that and **by 2016, the paper that was funded during the Gain of Function moratorium, that said that the SARS coronavirus was ‘poised for human emergence’, written by none other than Ralph Baric – was not only poised for human emergence, but it was patented for commercial exploitation 73 times.**”

NO LAB LEAK: COVID DEPLOYED TO LAUNCH THE ‘PAN-CORONAVIRUS’ VACCINE

Reiner interjects, “Ralph Baric – I think I saw a video clip where he said you can make a lot of money with this.”

“Yes, you can,” David replies, “and he has made a lot of money doing this.

“So for those who want to live in the illusion that somehow or another, that’s the end of the story, be prepared for a greater disappointment. Because somebody knew something in 2015 and 2016, which gave rise to my favorite quote of this entire pandemic. And by that, I’m not being cute. My favorite quote of this pandemic was a statement made in 2015 by Peter Daszak.

“The statement that was made by Peter Daszak in 2015, reported in the National Academies of Press publication, February 12, 2016, and I’m quoting, ‘We need to increase public understanding of the need for medical countermeasures, such as a pan-coronavirus vaccine. A key driver is the media and the economics will follow that hype. We need to use that hype to our advantage to get to the real issues. Investors will respond if they see profit at the end of the process.’

“Peter Daszak, the head of EcoHealth Alliance. Peter Daszak, the person who was independently corroborating the Chinese non-lab leak non-theory, because there wasn’t a lab leak. This was an intentional bioweapon of spike proteins, to inject into people, to get them addicted to a pan-coronavirus vaccine. This has nothing to do with a pathogen that was released and every study that’s ever been launched to try to verify a lab leak is a red herring.

Lawyer, Viviane Fischer comments, “And there’s really nothing that is new in this –”

“Nothing.” David replies. “73 patents on everything clinically novel. 73, all issued before 2019. And I’m going to give you the biggest bombshell of all, to prove that this was actually not a release of anything, because Patent #7279327, the patent on the recombinant nature of that lung-targeting coronavirus was transferred mysteriously from the University of North Carolina Chapel Hill to the National Institutes of Health in 2018.

“Now, here’s the problem with that. Under the [Bayh-Dole Act](#), the US Government already has what’s called a march-in provision. That means that if the US Government has paid for research, they’re entitled to benefit from that research at their demand or at their whim. So explain why, in 2017 and 2018, suddenly, the National Institutes of Health have to take ownership of the patent that they already had rights to, held by the University of North Carolina, Chapel Hill? And how did they need to file a certificate of correction to make sure that it was legally enforceable, because there was a typographical error in the grant reference in the first filing?”

“So they needed to make sure that not only did they get it right but they needed to make sure every typographical error that was contained in the patent was correct – on the single patent required to develop the Vaccine Research Institute’s mandate, which was shared by the University of North Carolina, Chapel Hill in November of 2019 and Moderna in November of 2019, when UNC Chapel Hill, NIAID and Moderna began the sequencing of a spike protein vaccine – a month before an outbreak ever happened.”

Reiner asks, “You have all the evidence, right?”

“Yep,” says David.

“So it’s all about money?”

“It’s always been all about money. And just to answer a question that was asked slightly earlier, the script for this was written first January 6th, 2004.”

Reiner says, “January 6th, 2004. Who wrote the script?”

“Merck, at the conference called *SARS and Bioterrorism*. ‘Bioterrorism and emerging infectious diseases, anti-microbials and immune modulators.’ Merck introduced the notion of what they called the ‘New Normal’, which is the language that became the branded campaign that was adopted by the World Health Organization, the Global Preparedness Monitoring Board, which was the board, upon which the Chinese Director of the Centers for Disease Control, Bill Gates’ Dr Elias of the Gates Foundation and Anthony Fauci sat together on that Board of Directors but the first introduction of the New Normal campaign, which was about getting people to accept a universal pan-influenza, pan-coronavirus vaccine was actually adopted January 6th, 2004.

“So it’s been around quite, quite a long time. I’m not going to belabor many more points, other than to say that it was very clear that Moderna knew that it was going to be placed at the front of the line, with respect to the development of a vaccine, in March of 2019. And this is a very important date. Because in March of 2019, for reasons that are not transparent, they suddenly amended a series of rejected patent filings, which is a very bizarre behavior. But they amended a bunch of patent filings to specifically make reference to an intentional or accidental – I’m sorry, their term: deliberate release – of coronavirus.

“So in March, they amended four failed patent applications to begin the process of a coronavirus vaccine development and they began dealing with a very significant problem that they had, which was that they relied on technology that they did not own. Two Canadian companies, [Arbutus](#) Pharmaceuticals and [Acuitus](#) Pharmaceuticals actually own the patent on the lipid nanoparticle envelope that’s required to deliver the injection of the mRNA fragment. And those patents have been issued both in Canada and the US and then around the world and their around-the-world equivalents.

“Moderna knew they did not own the rights and began trying to negotiate with Arbutus and Acuitus to get the resolution of the lipid nanoparticle patented technology available to be put into a vaccine. And we know, as I made reference to before, that **in November, they entered into a cooperative agreement with UNC Chapel Hill, with respect to getting the spike protein to put inside the lipid nanoparticle, so that they actually had a candidate vaccine before we had a pathogen, allegedly that was running around.**

“What makes that story most problematic, beyond the self-evident nature of it is that we know that from 2016 and 2019, at every one of the NIAID council board meetings, Anthony Fauci lamented the fact that he could not find a way to get people to accept the universal influenza vaccine, which was his favorite target. He was trying to get the population to engage on this process.

“And what becomes very evident, with Peter Daszak, EcoHealth Alliance, UNC Chapel Hill and others and then, most specifically, by March of 2019, in the amended patent filings of Moderna, we see that there is an epiphany that says, ‘What if there was an accidental or an intentional release of a respiratory pathogen?’

“And what makes that particular phrase problematic is it is exactly recited in the book, *A World at Risk*, which is the scenario that was put together by the World Health Organization in September of 2019. Months before there’s an alleged pathogen, which says that we need to have a coordinated, global experience of a respiratory pathogen release, which by September 2020, must put in place a universal capacity for public relations management, crowd control, and the acceptance of a universal vaccine mandate. That was September of 2019.

“And the language of a release of a respiratory pathogen was written into the scenario that ‘must be completed by September 2020...this was the Global Preparedness Monitoring Board’s unified statement. There are a number of people who have taken credit and then backed away from taking credit for it...”

Reiner’s group begins a Q&A and then David begins to wrap it up by recalling his experience investigating the anthrax attacks of 2001. He notes wryly that while 100,000 US troops had been sent to the Middle East to “get even” for 9/11, that two US Postal Service Inspectors were in charge of the anthrax investigation, the largest biological attack on US soil in its history.

Having seen all of that and having an organization that monitors all breaches of biological weapons treaty violations, that publishes lists of names and contact information and that identifies who is financing these breaches, **David says, “For us, it wasn’t hard to figure out that this was not a public health crisis, this was an opportunistic marketing campaign to address a stated objective. And that’s why this is Occam Razor, it’s the easiest thing to describe, because they’re the ones that said it. And the Occam’s Razor reality is that they said they needed to get the public to accept a pan-coronavirus vaccine countermeasure and they needed to the media to create the hype and investors would follow where they see profit.**

“You do not have anything else you need to rely on to explain the events of the past 20 months than the actual statement of the actual perpetrator. I don’t do the navel-gazing exercise of going in to try to understand whether there were ‘mommy issues’ behind a bank robber. If they’re holding a bag of money outside of a bank, I actually make the crazy assumption that maybe they’re a bank robber.

“Similarly, if I have somebody who says ‘We need to use the media to hype the medical countermeasure,’ which is actually the injection of a synthetic recombinant chimeric protein developed off a computer simulation, if I’m actually going to listen to the motivation for why that might be being done, I will listen to the person doing the simulation, who says, ‘Investors will follow where they see profit.’ I don’t need more explanation.”

I thought quite some time ago that there was something fishy about David Martin. I could see where he's a Trojan horse for the cabal. I voted for Trump but think he might be as well. Hope not but think it's possible.

I need to speak with someone ASAP! Is this children's medical center that runs children's medical center in Boston? If so, I have information on an outbreak of KD after a vaccine experiment in 1996.

Oh wow! My mind is reeling! I worked as the Occupational Health Nurse at the VA for 22 years. It was my job to coordinate and deliver the influenza vaccine. Overtime as I worked with the CDC and immunizations I realized there was something sinister with the influenza vaccine and program. They (VA) along with Joint Commission pushed and bullied me (along with nationwide VA's) to get vaccine rates to 90% by 2020. I had to write a plan every year to accomplish this. It was impossible and they realized it. I saw that it was no coincidence that covid came out in 2019. I

was looking for a swine/bird flu manipulation pandemic. It was no coincidence that I turned 60 with 27 years time in 2020 which opened the door to retirement. I wasn't ready but I knew the vaccine was in existence and I knew I couldn't administer it in good conscience. I knew when covid emerged they replaced influenza with covid but I only knew that because God led me in that direction. Thank you for validating this for me. Thank you for all this hard work. You didn't waste any time.

This deceptive “gatekeeper” is on point with some things (that’s called “limited hang out”) but repeatedly claims that the Rothschilds and other powerful “ethnic” families are NOTHING and that all the evil is being run by . . wait for it . . insurance companies. It apparently does not occur to this pretentious ass to wonder just who OWNS these insurance companies . . and banks . . and courts . . and education . . and Hollywood . . and Wall Street . . and the press . . etc, etc, etc. He talks like a trained linguistic programming manipulator to his audiences (which are apparently “vetted” ahead of time to weed out anyone with a brain) — I would YELL out like a barbarian (yes, and be ejected, so what) that he was full of shit, and why . . ! Even the fact that he is being widely promoted (a day late and a dollar short) AND not being rejected/deleted by YouTube should tell you all you need to know about this phony pretender. If he can't pass the “litmus test” re what group has virtually ALL the power and money, and name names . . then I don't care how many cute bow ties he has in his wardrobe, he is still a clown act, a diversion so we won't talk about who really NEEDS to be tried, convicted, and hung for worldwide treason and sabotage and mass murder. Over CENTURIES, not just since insurance companies spread across the USA and world.

Didn't understand:

They say Delta (or whatever) has the DNA-Seq. "A-B-C" and start to search for "A-B-C".
And they find "A-B-C" (somewhere in-between the seq.) and say: Yeah! Here is Delta!

Q: Do they find it inside the Corona-Virus-DNA-Sequence – or do they find "A-B-C" in the DNA of just anything that has DNA and has randomly been part of the sample? (Corona virus doesn't even need to be contained in the sample)?

Q: So the Corona virus exist (in it's original/unique form only) – but if it's really around nobody can tell because test finds any "A-B-C" (e.g., inside skin cell) and indicates POSITIV.

Sry, if/that I got it wrong.

I had a vision today, and this what it was...
I think I've figured this out.

I looked at pipeline today, and the stuff I saw would not hold high pressure liquid. In fact, its the same stuff they use to run fiber optic cable under the ocean.

I then looked at these 5g towers and realized these are not transmission towers, these are receiving towers.

Infrastructure is the stuff they are building underground. Please watch <https://youtu.be/aJ4TJ4-kkDw>

These pipeline are carrying fiber optics.

And then, that explains all this fracking, you've got to have an excuse for any "earth quakes" to cover up the blasting and drilling going on under our feet.

This is how they plan to enslave us.

There are numerous patents that I hope you'll look into, I'll just leave the list of numbers. They are going to 'quarantine' us a few at a time, but really, if we aren't killed, we'll be drugged and taken underground. They had their dry run drugging people with ketamine using the police when they would give the people they had in custody ketamine to 'calm them down'.

This is all about control. This is what the light rail is for, this is why we'll own nothing and be happy, this is why we'll have electric vehicles, you can't have combustion engines underground, this is why we won't need fossil fuels, its climate controlled underground....

Here's the numbers to look into...

5003186, 5005355, 5041834, 5056357, 5156802, 51448173, 5985239, 6034075, 8292000, 4042196, 4362271, 47112155, 4686605, 4873928, 6282526.

Ooh, hey hey, oh
World we're living in
Let me tell ya

And it's a wonder man can eat at all
When things are big that should be small
Who can tell what magic spells we'll be doing for us?
And I'm giving all my love to this world
Only to be told
I can't see, I can't breathe
No more will we be
And nothing's gonna change the way we live
'Cause we can always take but never give
And now that things are changing for the worse, see
Whoa, it's a crazy world we're living in
And I just can't see that half of us immersed in sin
Is all we have to give these

Futures made of virtual insanity
Now always seem to be governed by this love we have
For useless, twisting, other new technology
Oh, now there is no sound for we all live underground

And I'm thinking what a mess we're in
Hard to know where to begin
If I could slip the sickly ties of earth that man has made
And now every mother can choose a color
Of her child
That's not nature's way
Well that's what they said yesterday
There's nothing left to do but pray
I think it's time I found a new religion
Whoa, it's so insane
To synthesize another strain
There's something in these futures that we have to be told

Futures made of virtual insanity
Now always seem to be governed by this love we have
For useless, twisting, our new technology
Oh, now there is no sound for we all live underground, whoa

Now there is no sound
If we all live underground
And now it's virtual insanity
Forget your virtual reality
Oh, there's nothing so bad (happiness)
Oh yeah
I know, yeah
(Ooh)

Futures made of virtual insanity
Now always seem to be governed by this love we have
For useless, twisting, our new technology
Oh, now there is no sound for we all live underground, oh

(Livin' in, virtual insanity) Now this lie that we're living
It's all going wrong, it's out the window

(Livin' in, virtual insanity) You know that there is nothing worse than
(Livin' in, virtual insanity) A manly man, there is nothing worse than
(Livin' in, virtual insanity) A foolish man, yeah

Virtual insanity this world we're living in
Yeah, the world is all I have

David Martin later corrects himself that he had misspoken, namely it wasn't Merck but rather Moderna.

[Reply](#)

○ **Alexandra Bruce**

[July 15, 2021 at 2:36 am](#)

He talks about Merck writing the script for this pandemic in 2004. Moderna wasn't founded until 2010:

“Merck, at the conference called SARS and Bioterrorism. ‘Bioterrorism and emerging infectious diseases, antimicrobials and immune modulators.’ Merck introduced the notion of what they called the ‘New Normal’, which is the language that became the branded campaign that was adopted by the World Health Organization, the Global Preparedness Monitoring Board, which was the board, upon which the Chinese Director of the Centers for Disease Control, Bill Gates’ Dr Elias of the Gates Foundation and Anthony Fauci sat together on that Board of Directors but the first introduction of the New Normal campaign, which was about getting people to accept a universal pan-influenza, pan-coronavirus vaccine was actually adopted January 6th, 2004.”

Moderna was the Deep State “golden-haired boy” that was placed at the front of the line, with respect to the development of a vaccine. In November of 2019, UNC Chapel Hill, NIAID and Moderna began the sequencing of the spike protein vaccine – a month before an outbreak ever happened.

Moderna is an Israeli-owned/-run company with offices in the U.S. :

Moderna's Israeli chief medical officer helps spread his company's good COVID vaccine news

NOVEMBER 16, 2020 12:05 PM

<https://www.israel21c.org/modernas-israeli-medical-exec-awed-by-vaccine-results>

(JTA) — As the American [sic] drug company Moderna announced Monday that it had developed a COVID-19 vaccine that is 94.5% effective, Israeli scientist Tal Zaks was among the company leaders touting the good news to the media.

That’s because Zaks, who earned a doctorate at Ben-Gurion University in Beersheba, is the chief medical officer at Moderna and has been involved in overseeing its unprecedentedly rapid push for a coronavirus vaccine.

“The overall effectiveness has been remarkable ... it’s a great day,” he told BBC News.

In an interview last month with The Jerusalem Post, Zaks said he moved to the United States because it offered him a greater chance to “fulfill my dream and translate science into medicine.”

“I hope that Israel will continue to develop its bio-tech sector. Wherever I can be most effective is where you’ll find me,” the 54-year-old scientist said.

The previous month, Zaks told the Post that his 80-year-old mother lives in Raanana, Israel, and that the virus derailed his plans to see her during Passover earlier this year.

“I want her to get vaccinated and the rest of us to get vaccinated so life can return to normal,” he said. “I take this responsibility deeply and personally.”

Moderna’s vaccine will likely not be ready for mass distribution until the spring, but reports claim that it can survive in less extreme temperatures than the one by Pfizer, which requires special refrigeration. The Pfizer vaccine claimed recently to be 90% effective.

Pfizer CEO Albert Bourla is from a Jewish family in Thessaloniki, Greece, and its head scientist, Mikael Dolsten, is from a Jewish family in Sweden.

A year and a half ago, I watched a program on the science channel on TV wherein it was said the Earth is bombarded on a daily basis by trillions of viruses. I believe the patent trail presented on the program we have been listening to and “we the people” need to get involved in finding out exactly who unleashed the virus on us. Further, I believe Donald J. Trump would not have anything to do with the release of the virus so, don’t let anyone report the contrary.

[Reply](#)

• **Janine Largent**

[July 14, 2021 at 5:26 pm](#)

Fascinating information but I know for certain there is a virus which causes GI symptoms, cough, fatigue and loss of smell, is detectable in the nasopharynx PCR test and also leaves detectable antibodies in the blood. I know this for a fact because I contracted it. I had no fever or shortness of breath but I did have the other symptoms and the fatigue was long lasting (52 days to be exact). I have fully recovered and as I said I was never seriously ill. My husband, son, DIL and step son were also symptomatic and tested positive. Others in our family of contacts had no symptoms and tested negative. I donated blood six months later and my blood tested positive for Covid 19 my daughter who was PCR negative tested negative. There is a virus

[Reply](#)

He's not saying there isn't a virus, he's saying it's not novel.

He's saying that COVID-19 is the same SARS virus from the 2002-4 outbreak in Asia, which is a bioweapon engineered at UNC with funds allocated by Anthony Fauci.

[Reply](#)

▪

Foxy

[July 15, 2021 at 12:16 am](#)

Dear Alexandra,

You know full well, that there's no such thing as SARS-CoV-2 that exists. You, yourself, have presented ample evidence, through your video presentations, that this virus does not exist in isolation in any lab, anywhere in the world. The genome of the virus they claim to have sequenced is nothing but a computer-generated sequence (based on only 37 pairs; see link below*), and it's this computer-generated virus they've been patenting that Dr. Martin is talking about. I don't believe Dr. Martin's research has delved into the science of the virus itself, but rather concerned itself mainly with all the patent filings surrounding it. He's never mentioned once that he knows of an existing virus isolate anywhere.

Yet, we know that there's a killer (of some sort) on the loose! We cannot deny the experience of Janine Largent, and millions others like her. Somehow, someone, needs to reconcile all these facts for us. People are confused, because they're receiving mixed messages, consisting of seemingly conflicting facts, turths and experiences, not to mention lies, propaganda, and more lies and propaganda.

I'm sure you've heard the story of the four blind men, who were allowed to touch only one part of an elephant to guess what it is. They all named different animals based on the particular part they touched. I believe Dr. Martin has uncovered an invaluable mountain of indictable evidence that lawyers can take straight to the Supreme Court. But let's not kid ourselves, it's not been all about money all along. To claim as much is to give eugenicists, the likes of Gates & Fauci, a free pass. I don't blame Dr. Martin for not wanting to gaze at his naval gazing to figure out the real intent of these conspirators, because what he uncovered is enough to hang them all. It's true that "investors will respond if they see profit at the end of the process," but these investors are not necessarily the engineers, or final beneficiaries of this hoax. Their investment, after all, is only one essential step in

the success of the real planners' agenda.

Keep up the good work, Alexandra. I love and appreciate all that you do!

[Reply](#)

▪ **Alexandra Bruce**

[July 15, 2021 at 2:28 am](#)

I am not a virologist or a molecular biologist, so I know nothing.

David Martin says that SARS-CoV-2 has not been isolated. He says the 70-odd patents filed on the “novel” virus use different snippets of the same genome that is the SARS synthetic virus that was bioengineered and patented back in 2002, if indeed it was not a fraudulently-patented naturally-occurring coronavirus. I’m not sure that he knows the answer to that, either.

[Reply](#)

▪ **Sherab**

[July 17, 2021 at 8:51 pm](#)

Claiming that a ‘virus’ is the cause of a disease, condition (inflammation) is the same as claiming Firefighters must be the cause of fires, as they’re always found at the locations of fires.

The body naturally produces exosomes to deal with toxic conditions that arise, which threaten it.

Germ theorists (from the fraudulent Pasteur... to modern-day pharmaceutical industry driven medicine) misinterpret these exosomes to be the cause of disease, calling them viruses.

PCR only detects RNA fragments. Germ-theorists erroneously, some instances – dishonestly; use PCR to claim presence of an hypothetical, fictional pathogen.

▪ **Roberto. Werkhauser**

[July 15, 2021 at 7:22 pm](#)

Yes, yes, yes. That is the point.

[Reply](#)

- **Janine Largent**

[July 15, 2021 at 10:37 pm](#)

Alexandra,

I believe every thing he is saying but he does seem to imply that there is not real pandemic and I'd say that there is. I think it is far less deadly than they are suggesting, I know we are being lied to and I know this was a planned event.

[Reply](#)

- **Gregory Pravda**

[July 16, 2021 at 1:16 pm](#)

Doesn't a pandemic imply, at least, a high risk of death or injury? From the first round of this in 2020, it is obvious – I hope by now – that it was literally NOTHING LIKE what their computer models projected, which was the basis of ALL the actions taken last year. Sure, they used fraudulent PCR numbers to jack up the counts, but too many people know that nearly every death was blamed on COVID last year. That's criminal fraud, not a pandemic.

[Reply](#)

- **Dr Melinda. R.**

[July 15, 2021 at 6:46 pm](#)

There is a flu virus. The loss of smell and taste is due to the brain. The PCR test is absolutely total crap and the results mean nothing.

[Reply](#)

- **Janine Largent**

[July 15, 2021 at 10:44 pm](#)

Dr. Melinda,

I respect your opinion but I do think there is a SARS Cov2 because we had it. From the beginning I considered this a planned event and I still do. I don't think this virus is as deadly as they are saying and I believe a whole lot of the cardiovascular deaths were simply cardiovascular deaths. Cardiovascular disease is the leading cause of death in the US so it's pretty easy to hide a whole

bunch of covid deaths amidst those stats. The average age of death is 80 which pretty much coincides with the average life span. I do think it pushed a bunch of old folks over the edge and it is hard to explain some of the multiple family member deaths. Part of me thought there might be two SARS viruses out there SARS Cov1 and SARS Cov2 with the majority being the latter which is more transmittable and less deadly. Not doubt they know Hydroxychloroquine and Ivermectin would have helped a lot of people so they are guilty of mass murder for certain but I don't think the risk to the general public is high at all and I don't think the masks and social distancing did anything. There is very clearly a seasonal trend to the infections. This is no vaccine anymore than it was when Fauci tried to patent the technology for HIV. What a hoax on humanity. All part of the UN Agenda 21 and the Global Reset

[Reply](#)

▪ **Crystal**

[July 20, 2021 at 10:30 pm](#)

Can you explain due to the brain? I understand it's neurological and have heard darpa has it's hand in that part of this, but I am looking for a more exact cause they may have used and ideally a treatment/cure as I have a friend dealing with a really bad case of taste/smell loss. Any lead you could give would be a great help!

[Reply](#)

○ **Susan Brandt**

[July 19, 2021 at 4:05 am](#)

Don't know about the blood work.
Metal taste is from Graphene, which has been found not only in vax in huge amounts but also in masks and xovid test swabs, aledgely.
The PCR tests cannot be used in this way via the creator of test. (Who mysteriously died in 2020. Tests are a lie

[July 13, 2021 at 11:51 pm](#)

We now for sure know, thanks to Dr. Martin and his company, that this virus, pandemic, and vaccines are components of a bio weapon system that have been and continue to be intentionally used to attack the planet's population at large. Of course, if an attack is occurring there is someone or something that is doing the attacking. And in our being attacked, some of us have been and are being killed, some have been and are being injured and some, that have tried to protect themselves and others by getting "vaccinated," don't yet know how the attack on them is, over time, going to attack (or not) them personally. Perhaps not everyone that got the injection actually got whatever it is that's being put into the injection. Instead, maybe some injections were just a dose of saline solution. Who knows?

The second thing we know is that the attack by the few on the many, at least in part, is motivated by the desire for money.

So...now we know that someone has been and is indeed shooting at us and the intent, it appears, is sometimes to kill and other times to maim. What do we do now? Do we dare shoot back? Do we run for cover? Do we pretend we aren't being attacked by anyone and what is happening is just a random occurrence so we just do what we're told to do by the authorities? Do we attack Dr. Martin for disclosing this evidence?

[July 13, 2021 at 1:51 am](#)

So other than money what is the other reasons for giving the vaccine – I believe you called it a bio weapon. We see the side effects etc. is it a depopulation program or is that known?

[Reply](#)

- **Foxy**

[July 14, 2021 at 10:13 pm](#)

Yes, Susan, that's actually my only disagreement with Dr. Martin's conclusion. The motive behind the whole project could NOT have been all about money, as he asserts. If it were all about money, they didn't have to use a poisonous, health-destroying, maiming, killing-machine vaccine. Why did they have to go through all the trouble of using this mRNA technology, the nano-lipid envelope technology, and the newly discovered graphene-oxide nano particles, if all they wanted is to make trillions of dollars from vaccinating the whole earth population?

I can understand Dr. Martin's reason to not speculate on their true intent and stick to the material evidence on hand, and that's very commendable on his part. It further adds to his creditability in the eyes of any politicians looking to use his evidence. But we're not bound by Dr. Martin's position and reason to stop short at looking at further evidence pointing to their true depopulation agenda.

[Reply](#)

- **sharon a**

[July 15, 2021 at 9:39 pm](#)

....Definitely not for the good of humanity. As it's been said- "The "shot" was not created for the virus; the virus was created for the shot/the so called vaccine".

Other reasons for the shot besides money would be sterilization including affected future generations/eugenics, transhumanism/betterment, tracking, tracing, death, depopulation, vaccine enhanced diseases and creating lifetime patients from complications associated from adverse reactions....but Yes, mostly profit/money.

[Reply](#)

- **Julie**

[July 18, 2021 at 6:17 am](#)

I think he did say something about this vaccine creating an addiction to further on going vaccines, which would keep the money rolling in. I would think there is more to it than just money, especially when you see who is involved and the agenda they have.

[Reply](#)

○ **Cynthia Johnson**

[August 5, 2021 at 11:50 am](#)

I believe it is also (intentional or not) conditioning people and leading up to a cashless society. People will just accept these things into their bodies for the sake of their health at first then they accept the chips in their bodies as you can just wave a hand in front of a scanner without touching money or having close contact with another person. It's also convenient, no money, no card, no change, no checks....just a wave of the hand. Ultimately, the mark of the beast. You won't be able to buy or sell without it. The bible tells us this is coming. I believe we are definitely living out the end times

So I've been wondering, given all that's come out...what really happened to CDC scientist Timothy Cunningham who went for an unscheduled Feb swim in the Chattahoochee River outside Atlanta, leaving his car at work and his car keys and beloved dog at home alone.

A buried story out there somewhere is that he saw something in the Influenza shot that he raised concerns about...

Yes. Peoples' illness has been the flu and nothing more: <https://tinyurl.com/2v7hz32n>

In fact, here's more evidence to show they were exporting test kits in 2018!

<https://wits.worldbank.org/trade/comtrade/en/country/All/year/2018/tradeflow/Exports/partner/WLD/nomen/h5/product/382200>

Further, you have to first isolate the virus before you can produce an effective vaccine to combat the virus. They have NEVER isolated this virus, hence, their so-called "vaccine" was NEVER a vaccine.

<https://thefreedomarticles.com/10-reasons-sars-cov-2-imaginary-digital-theoretical-virus/>

GREAT JOB, Dr. David Martin!!! I predict we'll be seeing more of you. We are praying God protects you as you give voice in this fight against greed among the elites. Prayers also for Atty. Reiner Fuellmich and his team. Thank you, Alexandra, for posting this!!

So with all this proof, what is being done about it? Nothing!! They are still pushing the vaccine and on children now. The same propaganda is being spewed everyday by main stream media and Fauci is still allowed to show his face. It is sickening what this country has become all in the name of greed.

Yes Robin, it's hard to feel hopeful. But, the thing is... some people are good at researching, some are good at litigating. We should try to get this evidence in front of someone like Sydney Powell who is will to stand up to impossible odds fearlessly...

Brenda,

Yes, the flu has not gone away nor has heart problems or anything else that they have been putting down as CV deaths, but it is NOT just flu! There is a reason why people were falling like fly's in China in last January, as well as the other hotspots that showed up soon after. Wuhan was the "Silicon Valley" of China and was slated to be one of the first "Smart" cities over there, so had recently been outfitted with the new 5g which was just switched on. Furthermore, they had just implemented a recent round of vaccinations. The next hotspot was the cruise ship which had just been outfitted with 5g tech, and I'm sure people on board had recent shots as well. Then the next hotspot was Italy and their elderly generally 78 and older were surrounded by the new 5g and also had a recent round off vac's. Then you had New York and Washington State where the majority of the elderly get the flu shot and both areas had 5g.

I started watching where 5g had been installed and where it hadn't and saw a major connection. Other countries around Italy which did not have 5g only had a small fraction of #s of cases or deaths. Vietnam was another country that had no 5g and months into the plandemic had less than 50.

Originally I thought that the increased EMF output from the 5g was causing the difference since I have seen what just the EMF from a 5 min cell call can cause the red blood cells clump up through live blood microscopy and how PEMF can plump up and make them decluster and move much better with higher voltage. However I soon learned that was only a little bit of the equation. This didn't explain for the major clumping of the blood until I found out the magic bullet.

If you do a quick search on DARPA and graphene oxide you will see what is really up with the shots. If you recall hearing in this interview where he mentions that in 2018 Fauci was whining that he wasn't getting enough of the population to take flu shots? They have been putting graphene oxide into shots since at least 2017. SO since they couldn't get enough people to get it with the flu shot they needed to find a way to force everyone to get it.

This is all part of the Agenda 21 and Agenda 2030, NWO regime which states on their Georgia Guidestones that were erected in Georgia in the early 80's that the first statement recorded in 8 languages states; to drop the world population by 90%. So this is the start of the merry-go-round.

There are a number of doctors and bright researchers that are saying that we will start seeing the results of those who have gotten the jab within 6 months.

We will also be required to keep getting booster shots for a virus that doesn't even exist in the body, but the graphene is toxic and knocks out the immune function and CAN self assemble in the body.

<https://lifeboat.com/blog/2016/04/nanotubes-assemble-rice-introduces-teslaphoresis>

Yes they have been introducing stuff in the test kits which there was such a push to “test, test, test!

And yes there has never been anyone to actually isolate this or any other virus since there are only “fragments” that they can find (exosomes) fragments of cellular breakdown.

I agree that impetus for this pseudo-virus is to fulfill the objectives of Agenda 21 and Agenda 2030. I surmise the profit generating aspect of this scam is a secondary benefit to the perpetrators.
