Skunk Pharm Research LLC

RESEARCH AND DEVELOPMENT ONE SAFETY MEETING AT A TIME

Important Announcement!

Greetings,

Well people as times change so does the way we do things. It was stated that Carla would be moving and the Skunk Shack would no longer hold classes...guess what we are staying a little longer and classes will be resuming. Thanks to all you that make it possible and we are here to assist you with your training, purchases and knowledge.

Be Safe,

The gang at Specialized Formulations

Skunk Pharm Research

Please call 503.775.5003 or email jolyn@specializedformulations.com for further information.

Butane Honey Oil

BHO

Butane Honey Oil

BHO:

Much has been written and filmed on BHO extractions from green to cured and decarboxylated. Aside from purity, Skunk Pharm Research's main project is the volatile gas (butane) essential oil extraction apparatus. This project started due to the expense of large quantities of butane and how environmentally damaging it is to volatilize that butane into the atmosphere. The Terpenator Mark I was born, then automation was added. Since then, a passive unit (lil terp) and a small Terpenator as well as a mid-size dual tank unit have been added to the tool kit.

Now it matters not if you have only an ounce of your favorite night meds to run, or all your summer harvest. Specialized formulations can handle the job with a clean, keep Oregon Green, high yielding process.
