Question: [I need instructions on how to use internally for the skin.](#)

Answer:

I am not a medical professional so my answer is based only on my personal experience. I put the powder in a very small capsule and swallow it. I easily looked 15 years younger. Taking this internally reduces wrinkles better than any peel or topical application. I have been taking this for more than a year.

By J Roberts on November 2, 2021

it's food grade, i definitely take 1/4 tsp dissolved in 1/2 cup warm water at night before bed and place it covered in the fridge until morning and consume 1/4 Cup upon waking up in the morning, as well as, the other 1/4 Cup right before preparation of the next batch for the next day, which is right before bed for the last decade and i'm very youthful, limber, and definitely not dead! In addition, arthritis to the extent of deformity has been hereditary throughout my family, but i don't have it :) [see less](#)

It's to be used externally, not internally

Question: [When it is said to be sourced from small farms around the world, is that "other words" for China?](#)

Answer:

Mine says it's out of Norfolk Virginia

By Beauty Girl on October 10, 2019

Question: [Are the raw ingredients from this product sourced from China?](#)

Answer:

Unpretentious Skincare is manufactured in the USA. Raw ingredients are sourced with purpose and care from small farms around the world depending on seasonality and quality.

Question: [Is there a smell of any kind to the powder or to the finished serum?](#)

Answer:

There is no smell at all. I little goes a long way and I would recommend making very small batches as it will go bad and mold after about 2 weeks.
