Item Description

By Quicksilver Scientific

Each tablet of H2 Elite delivers 80 mg of magnesium malate in a proprietary hydrogen base. A serving size is 1 tablet. Each bottle contains 60 80-mg servings. Hydrogen, one of nature’s purest and gentlest antioxidants, is created by the natural reaction of magnesium with water. This advanced formulation can deliver the power of molecular hydrogen to any non-carbonated beverage.

Molecular hydrogen (H2) is a unique detoxifying molecule. In this formulation, millions of tiny molecular hydrogen bubbles dissolved in liquid are thought to rapidly diffuse into tissues.

Molecular hydrogen can support healthy metabolism and can encourage a healthy immune response. It can also support energy production.*

Molecular hydrogen is mild enough not to disturb the body’s normal molecular processes. Nonetheless, it is thought to be capable of efficiently neutralizing highly reactive compounds.*

Because some hydrogen-generating tablets require a closed container, Dr. Christopher Shade, Ph.D., developed this advanced formulation of H2 Elite, which does not need a closed container and dissolves in less than two minutes. H2 Elite generates about 10 ppm of molecular hydrogen in 500mL of water with each tablet – the highest concentration of hydrogen available in supplemental form that we’re aware of.

Product Info

Serving Size: **1 Tablet**

Servings Per Container: **60**

	Amount Per Serving	% Daily Value
Magnesium (magnesium malate)	80 mg	20%

Other Ingredients:

[Help](#)

Proprietary Hydrogen Matrix, Malic Acid, Dextrose, Tartaric Acid, Adipic Acid, Sodium Stearyl Fumarate

Dietary Considerations

- Gluten Free
- Vegan
- Non-GMO
- Allergen Free
- Soy Protein Free

Suggested Use

Drop one tablet in a cup of pure water (12-16 oz) wait for tablet to dissolve. Stir if necessary, drink immediately, repeat up to 3 times daily.

Warnings

Store in a cool dry place. Keep out of reach of children. Consult with your health practitioner before use if you are pregnant or nursing.
