How to test 35% Food Grade Hydrogen Peroxide to verify it is truly 35% Hydrogen Peroxide. Using our 400 ppm hydrogen peroxide test strips one can easily verify concentration of hydrogen peroxide. Use our concentration calculator <http://hydrogen2o2.com/hydrogen-perox...> to do the math for you. By adding 4 drops of 35% Hydrogen Peroxide to 8 ounces of distilled water you will have an concentration of .0386% or 386 ppm. We have noticed a growing concern with people selling diluted peroxides whether you are allowing Hydrogen 2o2 to be your trusted provider or purchasing from someone online this is an easy way to verify the true concentration.
