

Experiment Blog Th 9/29/2020: Niacin in solution

Updated October 1, 2020

Was possibly able to increase niacin in water solution by using niacinamide.

Niacinamide 150, 300, 450 mg in 3 ml water.

Then 1-2 drops tincture I.

Next able to add up to 100 mg niacin, additional 50 mg caused precipitation.

DMSO 3-4 ml helped but did not seem to change solubility.

More tests needed.

Also need to find thickener. Use olive oil and/or argan butter?
