Item Description
By Designs for Health

Silvercillin is an effective preparation of pure silver complexed with purified water, which exhibits antimicrobial properties.* Silvercillin™ uses Silver Sol Technology®, the term “sol” being a designation of a mineral permanently distributed into the structure of water. The silver becomes a part of that water molecule permanently so it will not fall out of solution or suspension.

Silvercillin™ contains 15 ppm of purified silver per serving. This is an incredibly powerful, non-toxic form of silver, with zero build-up in the body, so it does not cause argyria (blue man syndrome).
