

8. Q: Is any specialized equipment needed to furnish Medicare telehealth services under the new law?

A: Currently, CMS allows for use of telecommunications technology that have audio and video capabilities that are used for two-way, real-time interactive communication. For example, to the extent that many mobile computing devices have audio and video capabilities that may be used for two-way, real-time interactive communication they qualify as acceptable technology.

The new waiver in Section 1135(b) of the Social Security Act explicitly allows the Secretary to authorize use of telephones that have audio and video capabilities for the furnishing of Medicare telehealth services during the COVID-19 PHE. In addition, effective immediately, the HHS Office for Civil Rights (OCR) will exercise enforcement discretion and waive penalties for HIPAA violations against health care providers that serve patients in good faith through everyday communications technologies, such as FaceTime or Skype, during the COVID-19 nationwide public health emergency.
