

email from Andreas Kalcker 2020_11_22

Dear friends,

The year 2020 is coming to an end and I can say with certainty that it was a challenging and fruitful year. A year in which I have not rested, passing on my knowledge to anyone who would listen to me and making the decision to do everything possible to save human lives.

This year we have made impressive achievements in all aspects of health and development of the CDS. I am very happy that Bolivia has passed a law that allows the use of the CDS and today in Bolivia health is no longer "forbidden". Universities and hospitals around the world are currently engaged in research and development of this substance.

Until a year ago I fought this battle alone, but now I am no longer alone and I go hand in hand with hundreds of thousands of people - unity is strength! I am very grateful to all those who are involved in developing, supporting and fighting to make this happen.

Every day I receive hundreds of letters from all over the world, as people want to know more, share their experiences with me and often this leaves me with tears of happiness in my eyes.

In March 2020, I partnered with COMUSAV which is a worldwide organization to defend life and health. Today the organization includes about 20 countries, more than 3,500 doctors, more than 10,000 members in total, including lawyers and media people. The organization has about 60,000 supporters and each conference has millions of viewers.

The conferences are held every Saturday and are open to the general public. On the COMUSAV website you can view the conferences and find important information to improve health: www.comusav.com

I invite all physicians, lawyers and media to participate in the sacred work of saving lives through the following link: <https://comusav.com/contacto/>
From February 18 to 21, 2021, I will have the honor of participating, along with great health professionals, in the first international congress of regenerative medicine in Mexico City: <https://copalmech.mx/1er-congreso-nacional-de-medicina-regenerativa/>

Then on March 16, a conference will be held in Bolivia on the occasion of the International Day of the CDS, which is my birthday. 🎂

We'll be glad to see you there! We will publish more details in our forum www.saludprohibida.com, in Telegram <https://t.me/saludprohibidaandreasalcker> and in COMUSAV's social networks.

How did our forum begin?
On March 15, 2020 we opened our MegaForum, after our pages and groups where we published were eliminated from the conventional social media.

The forum made us independent so that we could keep in touch with all the people concerned about their health and give everyone a place to feel free to share and support our growing community. People from all over the world exchange their experiences here, making questions and getting support.

In our forum we have information collected for years, including all the protocols and videos deleted from the different social media. It also includes a social network (which works similar to Facebook) with groups and pages.

Registration and access to partial information is free and can be done through the following website: www.saludprohibida.com

I invite you to participate actively in the forum, where you can ask, get help, post comments and get access to a lot of valuable information.

The forbidden health forum is under a Swiss association because this allows us to legally publish the necessary information without being censored, as it happened to us before in the social networks.

If you wish, you can register as a member to have access to more information during one year for a small recovery fee, which allows us to continue with scientific research: <https://svnb.org/mitgliedsarten.html>

Thanks to the memberships, we can cover the costs of the association, the facilities, the security, the maintenance and other high expenses. We are very grateful for your support in making all this possible. 🙏

I am pleased to announce that in the near future I will be giving an exclusive lecture for the registered members of the association.

For any questions and assistance in registering for the forum or the association, please contact the following email: office@svnb.org

Now we have a free application of the forbidden health forum for mobiles and tablets: <https://play.google.com/store/apps/details?id=salud.prohibida4&hl=es>

If you are already registered with the association and have not yet visited the forum, we invite you to participate in this huge effort, to share and help the developing community. Now more than ever people need your help, a sense of security and the eradication of fears to receive as a gift the control of their health and the health of everyone.

If it has been several months since your registration, please contact support@svnb.org so we can extend your membership time.

Finally, I am happy to inform you that I am preparing a 24 unit course for all those professionals who need more information and support. Information about the course will be published soon on our official websites.

Thank you all very much!

Wishing health is allowed and sending love.

"Fear is an incredible salesman but a bad counselor, don't be afraid of fear"
Andreas and Grandpa Jo.
