Hi Steph and Sunny,

Here are some photos and ideas, still very much rough ideas.

Also struggling with location of cooktop--now it seems best on the wall that currently houses the fridge, but further toward the back of the house across from the sink. Also not closed to having the cooktop to the left of the stove on the island?

Regarding the utensil drawer under the cooktop, in our current kitchen it is too shallow. Would like to clarify the (height) of functional drawer space when using 6, 7, 8, or 9 inch drawers.

We look forward to our next meeting.

Best wishes,

Patti and Michael Cheikin

### Follow-up Ideas after 12/5

1. Cabinet lighting
2. Floor outlets?
3. Appliance garage
4. Wired Internet connections: Island, side counter
5. Sink moved to diagonal section of island
6. Pantry in central area
7. Range is 36", gas
8. Dog area facing into house.
9. Insulate Nook
10. Baseboards?
11. Include painting

12. Optimal cabinet
13. Drawer heights from 6" to 14" plus tall over oven for platters?
14. Pull-outs on either side of range?
15. Utensil drawer under cooktop—height issue? also for pots and pans.
